

The image displays four distinct, hand-drawn waveforms stacked vertically. The top waveform is red, the second is green, the third is orange, and the bottom is blue. Each waveform is a continuous, irregular line that fluctuates up and down across the frame, resembling a signal trace or a sketch of a function. The red waveform has the highest peaks, while the blue waveform has the lowest. The green and orange waveforms are in between. The lines are drawn with a consistent thickness and have a slightly rough, organic quality.
