

Figure 1: A line graph showing the evolution of the average number of nodes in the largest component, N_s , as a function of the parameter α . The x-axis ranges from -1.5 to 2.0, and the y-axis ranges from 0.0 to 1.0. The curve starts at approximately (-1.5, 0.05), rises to a peak of about 0.9 at $\alpha = -0.5$, and then decreases to about 0.2 at $\alpha = 2.0$.
